The road of investigation, the search or the experimentation is, per definition, uncomfortable, not only because it supposes a conquest of a canon, but also the establishment of the doorway to those canons. This means, that at the same time the work is created, the patterns that help to interpret the work in its context are created, which in most cases are being reduced to the work in itself, as an only reference to itself.

In the autumn of 2006, La Única Puerta a la Izquierda (The Only Door to the Left) L.U.P.I offered the encounter between currents, tendencies and “operators” that had as uniting link that experimentation, and offered to the public, more than a simple exhibition that is unusual or showy, an intense debate about our complex cultural and artistic reality.

One of the first conclusions drawn from those *I Jornadas de Poesía Experimental de Euskadi / Euskal Herriko Poesia Esperimentalaren I Jardunaldiak* was that these forms of creations find their principal support in specialized publications and editions, minorities because they are very limited, because on their own create a piece of art and because mostly they owe their existence to the insistence of their creators. The Barakaldese magazine *Metamorfosis* is a representative example of this through its insistent labour, for 9 years running, in which the work of over a hundred and forty authors has been reunited.

Today the *Biennale of Experimental Poetry in Euskadi - EXPOESÍA 2008*, recovers those “*I Jornadas...*” celebrated in Barakaldo in 2006, therefore the coordinators and the Cultural Association *L.U.P.I.* have decided to organise the following convocation.
